Kitchen / Master Suite / Bar Remodel

4

2134 Ascot | Ann Arbor

Our goal is to provide you with an outstanding remodeling experience. We do this through a design build process that yields the design you need, the budget you want, and the quality outcome you deserve. The way you remodel makes a world of difference. Put DESIGN first and call us to discover the possibilities. We are more than just an architect, and more than just a contractor. Visit us at www.planforward.net.

PROJECT > Kitchen / Master Suite / Bar Remodel

Goals: Our clients purchased their home with the intention to remodel to fit their needs. They wanted to create a more modern and open kitchen and dining area in this split level house that is more conducive to cooking and entertaining. They also desired to enlarge the master suite for a more spacious and luxurious experience. Finally, they wanted to add a bar in an existing closet in the lower level for entertaining.

Design Build Solution: By removing the wall between the kitchen and dining room, we created a larger, more open space that is perfect for gathering. The master bath was extended halfway into a bedroom while the rest of the bedroom was converted into a large walk-in-closet. The three bedrooms on the second floor were reorganized to create one large master suite and an office. A second entertaining area was created on the basement level by converting a large coat closet into a bar with built-in cabinetry and refrigeration.

DIRECTIONS > From the intersection of Main St. and Scio Church Rd, head west on Scio Church Rd towards S Maple Rd. Turn left onto Chaucer. Turn Left onto Ascot.
