Master Suite Remodel / 3rd Floor Remodel

6

2120 Wallingford Road | Ann Arbor

*Rochman Design-Build has a core philosophy that inspirational design can harmonize, enhance, and enliven any home's existing style. We are very grateful for the long-term relationships we have built with so many clients, and for our numerous national and regional design awards, including a 2011 NARI Contractor of the Year Award for an accessible bathroom. Talk to us, and talk to our many repeat clients; we create an **Experience Beyond Remodeling.***

PROJECT > Master Suite Remodel / 3rd Floor Remodel

Several projects are on display in this stately 1920's home in Ives Woods. Our phased work for this family has included detailed remodeling in the master suite, living room, second floor bath, and third floor attic.

The new spacious master bath features marble tiles, mahogany cabinetry, crystal lighting, a walk-in shower and a claw foot tub. The overall master suite was reconfigured and enlarged to also have a walk-in closet with custom storage, a mini-laundry area, and a fireplace.

The 3rd floor attic was remodeled to create a comfortable family room, exercise area, kitchenette, and flexible area currently used for scrapbooking and crafts.

In the living room, a new flat screen TV was designed to blend in over a very traditional fireplace and painted mantle— you will see it disappear “through” a gold-framed mirror.

Come see how the design and the construction of our new work blends seamlessly with this classic home.

DIRECTIONS > Travel on Stadium Blvd going east past Packard Rd. Turn left at Harding Rd, going north. Harding dead-ends into Wallingford and the house is at that corner on southeast side.
