PROJECT > 2nd Story Addition / Whole House Remodel

Kastler Construction transformed an outdated 2,200 square foot 1949 Royal Oak Bungalow into a 3,000 square foot Mission style 2 story home. The first floor living space was reworked and the entire second floor structure was removed. The first floor was modified with an all new full bath and a gourmet top of the line kitchen with an adjoining light-filled sunroom. The second floor addition includes a deluxe master suite with a one of a kind bathroom retreat, 2 additional bedrooms and a full bath. The home was given all new custom floor finishes and the outdated fireplace was modernized with a distinctive ledge stone surround and custom made built-ins. The exterior was altered to give it an all new Mission style look including new windows, cedar shake siding, high end doors and new Mission-style columns. Come see for yourself how Kastler Construction has transformed your typical outdated one and a half story bungalow into a gorgeous custom Mission Style Home.

DIRECTIONS > Woodward Ave. to Catalpa Dr (11 ½ Mile Rd), East. Travel North onto N. Lafayette Ave. Located at the intersection of N. Lafayette Ave. and W. Derby Ave.
